## UPDATE to JCP&L Peak Load Share and MW-Measure

The BGS Auction Manager is updating the announcement first issued on November 13, 2019 to update the Peak Load Share and MW-measure for JCP&L. Please see the announcement [here](#) for more details.

Please find below, for the BGS-RSCP Auction:

- the tranche target for each EDC;
- the statewide load cap;
- the load cap for each EDC; and
- the size and MW-measure for each tranche.

A tranche target is the number of tranches needed for a given EDC at the beginning of the Auction. There is a statewide load cap of **20 tranches**, which is the maximum number of tranches that a bidder can bid in the Auction and serve statewide. There is an EDC Load Cap for each EDC, which is a maximum number of tranches for the EDC that a bidder can bid in the Auction and serve for that EDC.
