Bid Round 2	10	1	2	1
<i>Exit Price</i>			<i>11.400</i>	

- A bidder must enter an **exit price** (a final and best offer)
 - Above current going price
 - Below or equal to previous going price

A BIDDER COULD NEED TO PROVIDE ADDITIONAL INFORMATION WHEN SWITCHING

BGS-CIEP Auction Example				
EDC	PSE&G	JCP&L	ACE	RECO
Price Round 1	480.00	495.00	460.00	465.00
Bid Round 1	2	7	2	1
Price Round 2	480.00	480.15	446.20	465.00
Bid Round 2	6	1	4	1
<i>Switching Priority</i>	1		2	

- When a bidder reduces the tranches bid on one or more EDCs and increases the number of tranches bid on **more than one** EDC, the bidder will be asked for a switching priority
- This is used when only some of the reductions can be granted

A BIDDER COULD NEED TO PROVIDE ADDITIONAL INFORMATION WHEN SWITCHING AND WITHDRAWING

BGS-CIEP Auction Example				
EDC	PSE&G	JCP&L	ACE	RECO
Price Round 1	480.00	495.00	460.00	465.00
Bid Round 1	2	5	2	1
Price Round 2	480.00	480.15	446.20	465.00
Bid Round 2	4	2	3	0
Exit		✓		
Exit Price		490.00		

- When decreasing the number of tranches bid from more than one EDC **and** switching, the bidder will be asked to designate which tranche is being withdrawn
- The bidder names an exit price for the withdrawn tranche

CHANGES IN ROUND 2 REPORTING (FROM ROUND 1)

- A bidder can **request** a switch or a withdrawal – but it **may not always be granted**
 - Auction Manager may retain tranches from exits or switches if necessary to fill the tranche targets
 - Auction Manager fills tranche target first with tranches bid at the going price, then by retaining exits, then by denying switches (if necessary)
- When **getting information about own bid**, bidder will get information regarding:
 - Any tranches requested to be withdrawn that were retained (retained at the named exit price)
 - Any tranches requested to be switched that were denied (retained at the last price at which tranches were freely bid)

HOW DOES THE AUCTION END?

- Rules in rounds 3, 4, etc. are the same as the rules in round 2
- Auction closes:
 - When **total excess supply equals zero** and prices no longer tick down
- Bidding on **all EDCs** will stop at the **same time** and all bidders that win tranches for an EDC **get the same price**
